Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Assadi (6,642,963).

2. Regarding claim 1, Assadi discloses a method of forming a solid-state image sensor, comprising the steps of: forming a plurality of photosensor elements (Figure 2, reference 105) on a substrate (Figure 2, reference 171); forming a plurality of color filters on the plurality of photosensors (Figure 2, reference 178); forming a light blocking member between adjacent color filters (Figure 2, reference 174); and forming a plurality of microlenses on the plurality of color filters (Figure 2, reference 173); wherein each photosensor corresponds to each color filter and each microlens, for receiving an incident light of specific spectrum (column 3, lines 57-67 thru column 4, lines 1-4)).

Art Unit: 2813

3. Regarding claim 2, Assadi discloses wherein the light blocking member comprises a light-impervious film made of metal or chemical compound (Figure 2, reference 174).

4. Regarding claim 3, Assadi discloses wherein the image sensor is a charge coupled device (CCD) (column 1, lines 12-21).

5. Regarding claim 4, Assadi discloses wherein the image sensor is a CMOS sensor (column 1, lines 12-21)
